

## Japanese bath

**Year:**  
2009

**Program:**  
Creation of a private space of relaxation in the park of a holiday house with a Japanese bath, a sauna, a shower and a changing room.

**Project management:**  
Privé

**Project manager:**  
Goudchaux Architecte & Associés

**Mission:**  
Mission de base

**Area:**  
60 m<sup>2</sup>

This project is situated on a plot of land which contained two small buildings: a barn in ground floor in very poor condition and a secondary deposit. Buildings being very damaged (roof and facades) it was decided to renew them completely and to create a connection between both.

The architectural part was dictated by a will to emphasize the old building and its re-use.

The outside aspect is little modified. Openings are created on the facade in the same spirit as those existing.

The outside are treated (handled) in the style of a Japanese garden.
